SKILLS

NodeJS

Completed small scale applications using Node Js with MongoDB, MySQL DB and socket.io.

React-Native, Redux, Firebase

Developed three Android/IOS applications with react native and firebase as database.

REST API/GraphQL

Developed chat messenger using GraphQL, socket.io and NodeJs with mongoDB as database.

Django

Developed multiple web apps and used its services in mobile applications.

Laravel

Completed multiple projects with PHP laravel.

JavaScript & jQuery

Completed more than a dozen small scale web applications.

PHP Core

Developed multiple web applications and apis.

ROS(Robot Operating System)

Made autonomous navigation Robot using SLAM as my final year project.

ASP.NET MVC 5

Developed multiple web applications and apis.

.NET desktop app development

Developed management systems and small scale applications.

HTML/CSS

Developed some basic website themes.

FINAL YEAR PROJECT

I worked on AGV(Automatic Guided Vehicle) based interpretation using SLAM(Simultaneous localization and mapping) as my final year project. The project is based on two modules, first module is AGV and second one is scene interpretation. Software part of AGV module is developed using ROS indigo and connected it to hardware part via ROS-Arduino Bridge. Scene interpretation uses Openpose for joint detection and CNN for object detection (objects as pistol,knife and baggage).
